

# POWDER TRANSFER MAGNET

## EFFICIENT, AERODYNAMIC & USER FRIENDLY

Ideal for powder applications in vertical installations of pneumatic transfer lines.

High intensity magnets configured to remove weak magnetic contamination including work hardened stainless steel fragments.

- Cost effective solution for vertical blowlines 3" - 6" (76mm - 152mm)
- Inlet / outlet fittings; plain butt or customers choice (Purge welded)
- Effective fragment control in high velocity transfer lines.

CERTIFIED TO  
**10-11,000  
GAUSS**  
MINIMUM

**RARE EARTH MAGNETIC SEPARATION TECHNOLOGY**

Fully designed and manufactured by MAGNATTACK™ Global.

# POWDER TRANSFER MAGNET

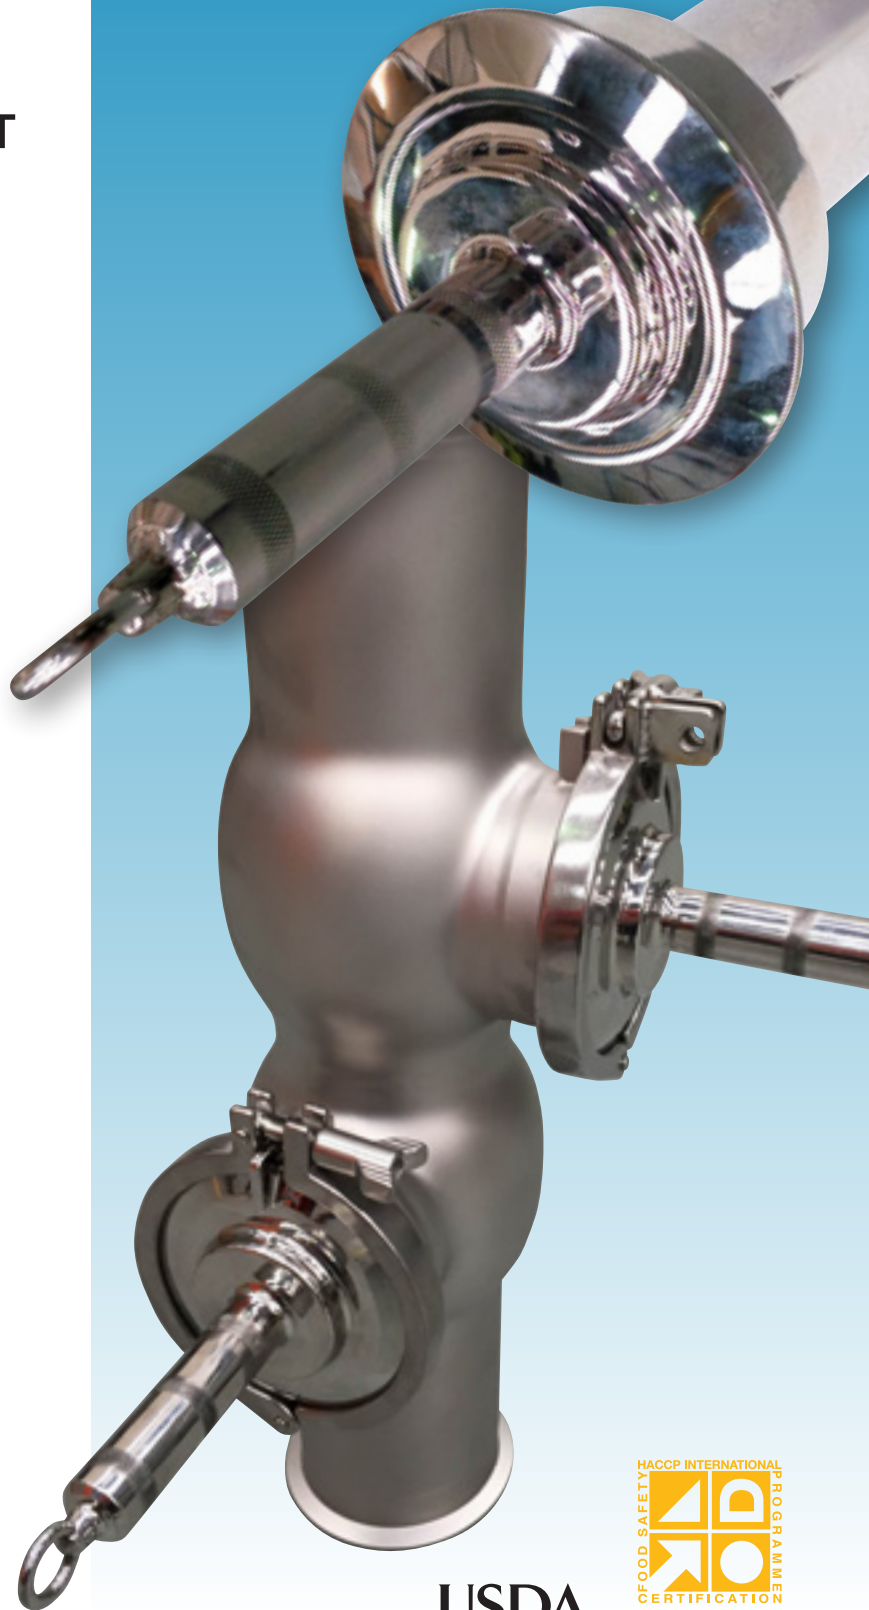

## BENEFITS

- Sanitary SS Food Grade >RA-1 product surface finish to USDA specifications.
- RE80™ magnetics
- Improved separation efficiency in vertical pipeline
- Double side entry magnets
- 10 - 11,000 gauss with high gauss tear drop shaped magnets for improved separation efficiency and optimum extraction
- Aerodynamic design to minimize bulk density break down
- Designed for CIP cleaning
- No ponding of product or CIP fluids

## USES

- Powders of up to 16mm particulate
- Pipelines 3" - 6"
- Suits abrasive powders, e.g. sugar
- Extraction of metal fines and work hardened stainless steel.
- Dairy Powders
- Pharmaceutical Powders
- Infant Formulas
- Lactose Powders

Conforms with 0909MAGSEP 1-2010  
International Food Safety Standard.
